

EDUCATION

Aalto University

Exchange of six months, studying cryptography, number theory and parallel programming.

Helsinki, Finland

Sep 2026 – Dec 2026

Télécom Paris

Diplôme d'Ingénieur (equivalent to Master of Science).

Majors: Cryptography, Quantum Computing, and Operations Research.

Palaiseau, France

2024 – 2027

Preparatory Classes, Lycée Hoche

Intensive two-year program in advanced computer science, mathematics, and physics.

Ranked in the top 2% of candidates in the most competitive exams.

Versailles, France

2022 – 2024

EXPERIENCE

Lycée Hoche

Oral examiner in mathematics

- Part-time job, helping students prepare for the mathematics orals of the top French Schools

Versailles, France

Sep 2024 – Jun 2025

Enensys

Internship in the Research & Development section

- Re-shaped their user database with appropriate permissions
- Python, LDAPs, Docker, Keycloak, Databases

Rennes, France

Summer 2025

ACHIEVEMENTS AND PROJECTS

- Full repository of projects and achievements: pacomef.github.io
- ICPC Contestant, Qualified for European Finals in 2026 (top 150 contestants in Europe) 2024 – Today
- Project Euler, 400+ problems solved, ranked in the top 50 in France. 2019 – Today
 - Advanced Algebra, Number Theory, and Research-level algorithms. (Python3, C++, CUDA, Sage)
- Smaller projects:
 - Assembly x64 compiler for C and interpreter for Python3; automatic video rendering of graph algorithms (ffmpeg, Python3, Blender, RabbitMQ); implementation of $O(n \log n)$ Delaunay Triangulation through R-Tree (in pure C)

SKILLS

- **Languages:** Python3, C++, C, Sage, x86-64 Assembly
- **Math & Crypto:** Cryptography, Number Theory, Quantum Computing, Operations Research
- **Systems & Tools:** Docker, Keycloak, LDAP, Nginx, RabbitMQ, CUDA, Django, Selenium, SQLite3/PostgreSQL, ffmpeg, Blender

LANGUAGES

- **French:** Native **English:** Professional (C1 CEFR, Linguaskill 180+)
